Now available in MyWTA – “Results Ready to Transmit” screen.

The latest addition to MyWTA is a screen that shows tests that are complete and ready to be picked up via the Broker Comms system. This is beneficial to customers as it will clearly indicate if any test data is available for collection. A second screen displays any of your tests that are queued for a third-party to receive (where this has been requested). The screen is accessible from the Menu option at the top of the screen.

Choose the “Results Ready to Transmit” option and a screen will display any certificates waiting for you to pick up via Broker Comms. This list is sorted by Reference/Folio and shows the following:

Refresh		Queued – to Others		Our results waiting to be picked up.						
Code	Sale	Lot No	Reference/Folio	Brand	Desc	Test	Certs	Bales	Date Completed

The “Refresh” button simply checks our system again and updates the screen.

The “Queued – to Others” button will let you view your tests that are queued ready to be picked up by a third party.
